

KABA®

Carl F

The GeGe RAM Anti-Bump Euro Profile Cylinder

Enhanced Security to the very latest standard. Required to meet the latest requirements of PAS24 and Secured by Design. The new cylinder offered by Carl F is the first to be awarded the Kitemark.

Beat "Bumping" with this new patented cylinder

"Bumping" is a simple method of releasing a lock with minimal effort, using readily available tools and leaving no visible sign of attack.

The new patented GeGe RAM (Resistance Against Manipulation) cylinder incorporates special pins and configurations which successfully resist bumping.

A comprehensive range of sizes, including thumb turn locks is available from Carl F.

To comply with PAS24 and Secured by Design, the door will also need other components which perform to the highest standards under the strict test regime.

Carl F can provide:

- **FUHR Type 3 multi-point lock.**
- **HOPPE Enhanced Security PAS24 handle set.**
- **SIMONSWERK 3-D adjustable hinges.**

LAPFAG

The GeGe RAM Anti-Bump Euro Profile Cylinder

PAS24 and Secured by Design licence holders will, we are led to believe, be obliged to use a Kitemark cylinder. Social housing specifiers are already demanding anti-bump cylinders. Local authorities will want to protect themselves and their tenants. The Kitemark will guarantee access to this market. It remains to be seen how the private householder will react.

Licence No. KM 526410 BS EN 1303:2005 Building hardware. Cylinders for locks.

The GeGe RAM cylinder can replace any standard Euro-profile cylinder. Each cylinder is individually boxed and comes complete with fixing screw and 3 keys. Pairs and Key alike cylinders and even Master suites are available to order. Please call our Sales office with your enquiries.

Product Range

Please note that we will be building our stock range through the first quarter – not all sizes will be in stock from January.

Size	Key to differ		Knob Cylinder
