

Defender Egress / Easy Clean

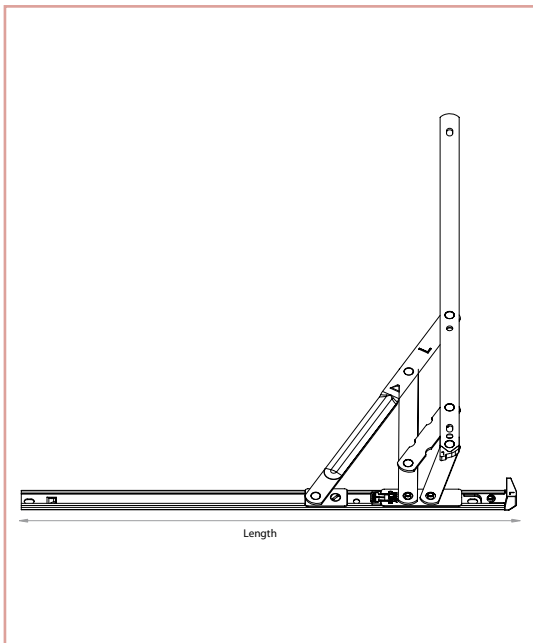

- Secured by Design
- Automatically resets when window is closed
- Opens to 90 degrees for emergency exit
- Compliant with FENSA requirements
- Easy clean facility
- GGF approved
- BBA assessed

The Defender Egress allows casement windows to open a full 90° for emergency exit to comply with BS5588 Part 1:1990 (Fire precautions in design) and Building Regulations for fire escape windows. The hinge should be incorporated in one or more first floor windows. The Defender Egress is designed to allow easy window cleaning from the inside and complies with BS8213 part 1: 2004 (Windows, doors and rooflights. Designed for safety in use when cleaning windows, including door-height and roof windows).

Performs to BS7950 and Secured by Design when used in conjunction with Vector Excluder see page 152.
