

# FUHR Door Locks Keeps and Plates

A full range of system specific locking plates designed to suit your profile. The plates are all custom engineered to ensure they accurately fit your profile system without any need for additional end caps or packers. The integral end caps and design of the steel u-rail ensure that the plate is in the correct position every time. The fixing screw hole positions are specifically configured for each profile, and ensure where possible that the screws always fix into reinforcing. Adjustment features are designed into many of the plates to ensure optimum compression and weathersealing. With locking plate suites for over 200 PVCu, timber and composite profile systems, FUHR have a secure and user-friendly solution for all applications.

## Latch Deadbolt Plate

**One and Two Piece Keep Plates**

Incorporating all the features and benefits of FUHR striker technology these keeps will save time in the factory and for installers. The one and two piece plates are profile related; they locate accurately and reliably, with complete integrity between the different locking points. The adjustment ensures the right compression and weathersealing. The keeps are designed for use with FUHR Type 3 Hook Locking Doorbolts. The One Piece Keep is compatible with the FUHR 856 Type 3 Lock and the 859 Type 3 Lock. The Two Piece Keep is compatible with the FUHR 856 Type 6 Lock and the 859 Type 6 Lock.

Profile Specific:  
 Adjustable + / - 1.5mm for Hook  
 Adjustable + / - 2.0mm for Latch Plate  
 Handed left or right  
 Integral buckets  
 One Piece suits all FUHR 859 and 859 Type 3 Locks  
 Two Piece suits all FUHR 859 and 859 Type 6 Locks
