

# STALLION 2 SHOOTBOLT

## KEY PRODUCT FEATURES

- Fast-fit telescopic design with auto setting function reduces fabrication time and eliminates the need for cropping.
- Clips into Eurogroove reducing the number of screws required in fitting.
- Rising cam system provides improved sash to frame clearance while maintaining tight compression.
- Compression adjustable locking cams.
- High security and BBA accredited.

# STALLION 2 SHOOTBOLT

## Product Specification

**Carl F**  
International

The Stallion 2 Shootbolt is suitable for use on Eurogroove with full or half depth. The quick fit telescopic feature requires no cutting or cropping, resulting in fast fitting process. Additionally, the unique clip in design feature allows the lock to be clicked into place on the Eurogroove, reducing the number of screws required in fitting.

An automatic self setting action fixes the shootbolt at the desired length while rising cams maximise engagement and frame clearance. Not only does this feature prevent cam damage to the frame but gives added security to the window.

## TECHNICAL SPECIFICATION

**SASH  
REBATE  
SIZES**

Standard  
Size 1 = 300mm - 400mm  
Size 2 = 400mm - 540mm  
Size 3 = 540mm - 820mm  
Size 4 = 820mm - 1300mm  
Size 5 = 1300mm - 1750mm

Offset handle positions are possible to order

## TESTING & ACCREDITATION

UKAS laboratory tested to BS EN 1670: 1998 and exceeded grade 4 classification for ultimate corrosion resistance.

Tested to over 30,000 cycles under operational load.

Attained BS7950 across a comprehensive range of window systems.

Secured By Design Accredited

BBA accreditation certificate number 2769
