

Vector Excluder Lock

- Austenitic stainless steel
- Dual action high security lock
- Secures sash to frame AND frame to sash
- Quick to fit
- No cropping or bar adjustment
- Minimum screw fixing
- 10 year guarantee
- Secured by Design

A unique dual action security lock, by securing the sash to the frame and the frame to the sash. Designed to exceed BS7950, the industry standard for window security, the Excluder's durability has been proven in cycle tests to exceed 30,000 cycles, and corrosion resistance to more than 500 hours salt spray test.

Installation is quick and straightforward with a minimal number of screw fixings, and no cropping or bar adjustment.

Profile specific keeps are available for leading profile systems, please refer to page 113.
